B013 | PGAM5 / T-exhaustion spatial RNA neighborhoods

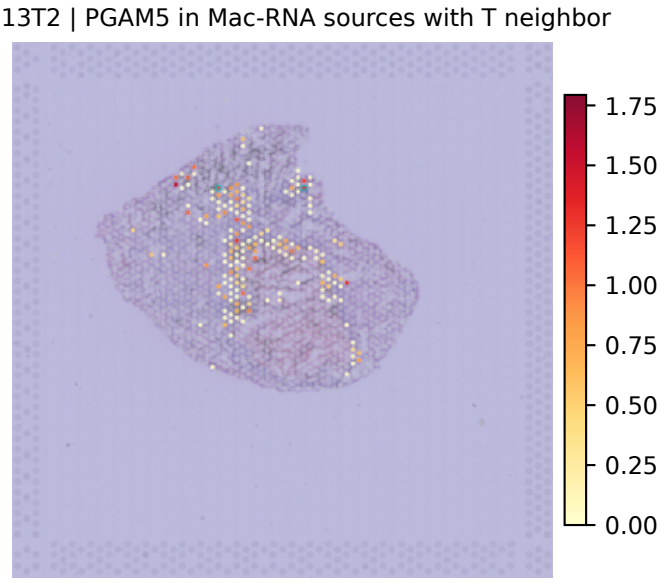

B0013T1 | PGAM5 in Mac-RNA sources with T neighbor

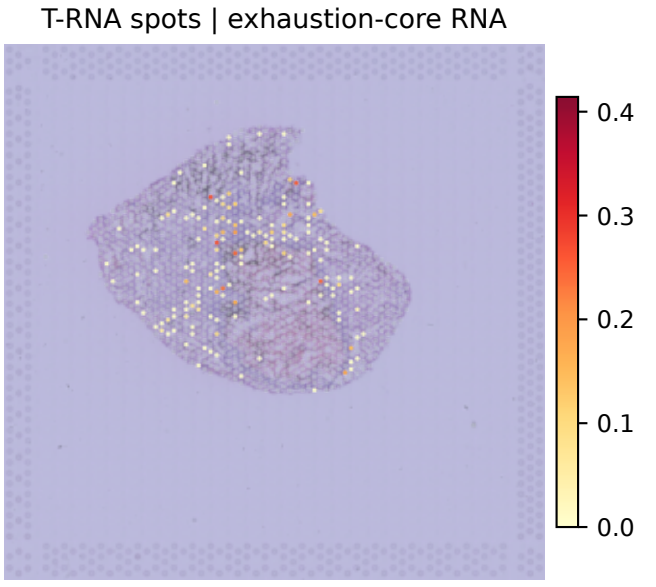

T-RNA spots | exhaustion-core RNA

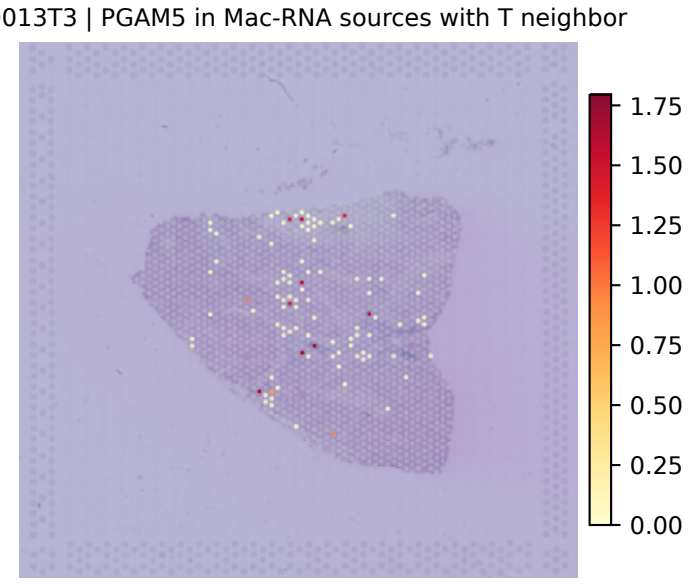

B0013T2 | PGAM5 in Mac-RNA sources with T neighbor

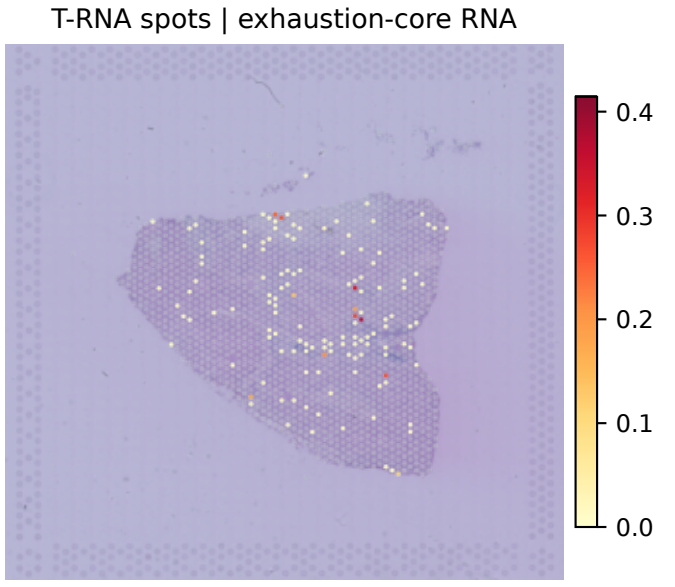

T-RNA spots | exhaustion-core RNA

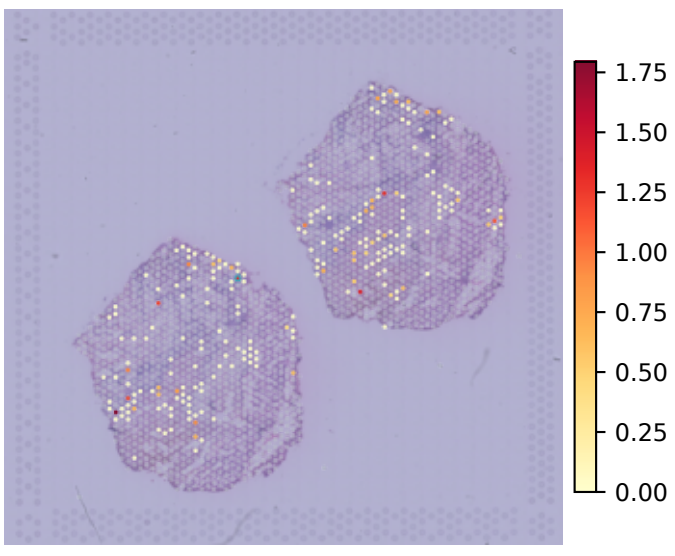

B0013T3 | PGAM5 in Mac-RNA sources with T neighbor

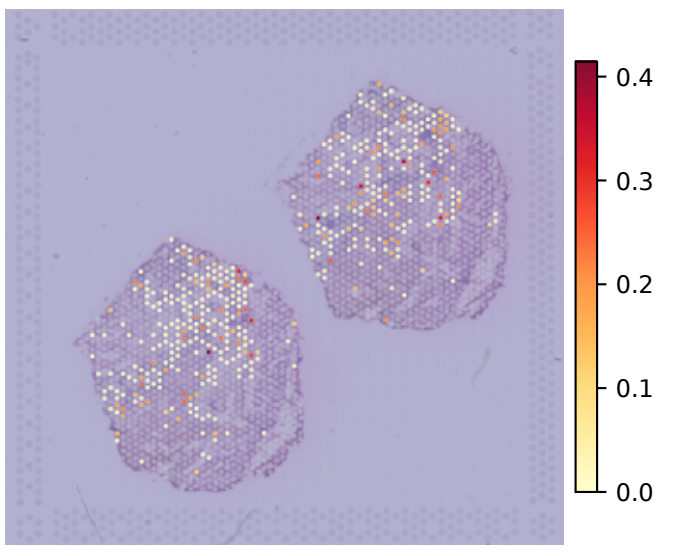

T-RNA spots | exhaustion-core RNA

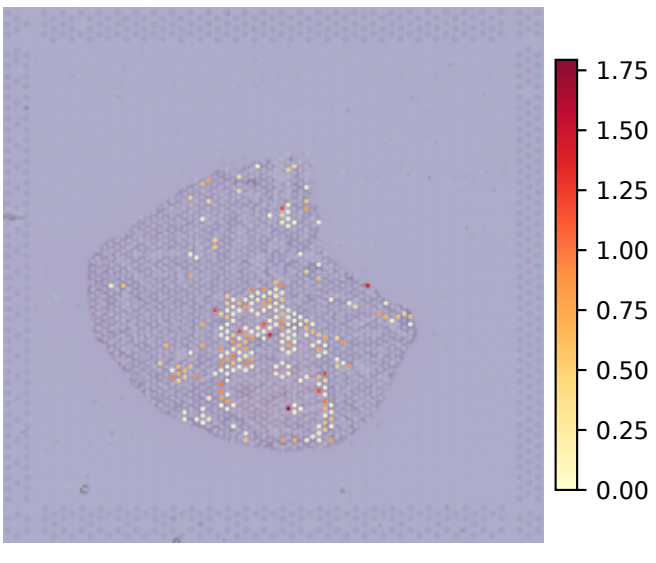

B0013T4 | PGAM5 in Mac-RNA sources with T neighbor

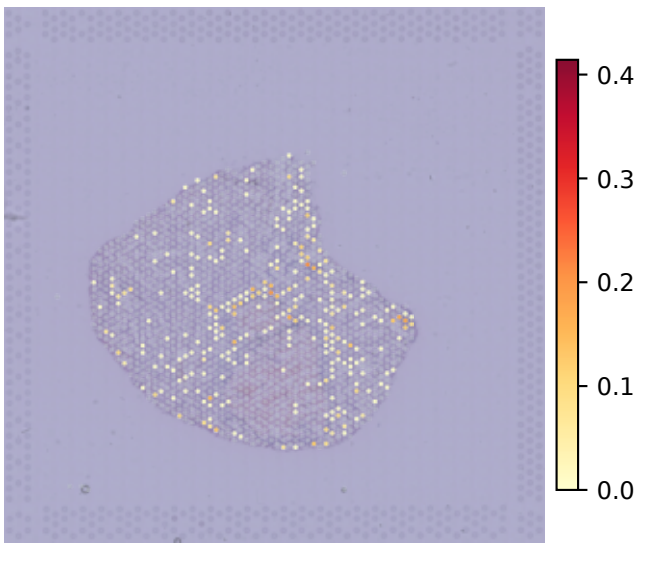

T-RNA spots | exhaustion-core RNA

B013T5 | PGAM5 in Mac-RNA sources with T neighbor

T-RNA spots | exhaustion-core RNA

True Visium positions on original H&E. Grey = outside displayed RNA gate. Cyan rings = high-PGAM5 Mac-RNA source next to exhaustion-supported T-RNA.
Color: log1p(CP10k) for PGAM5; mean log1p(CP10k) for exhaustion. Shared scales; display clipping at cohort-wide maximum section Q99.
Co-localization alone is not evidence that macrophage PGAM5 promotes T-cell exhaustion.
