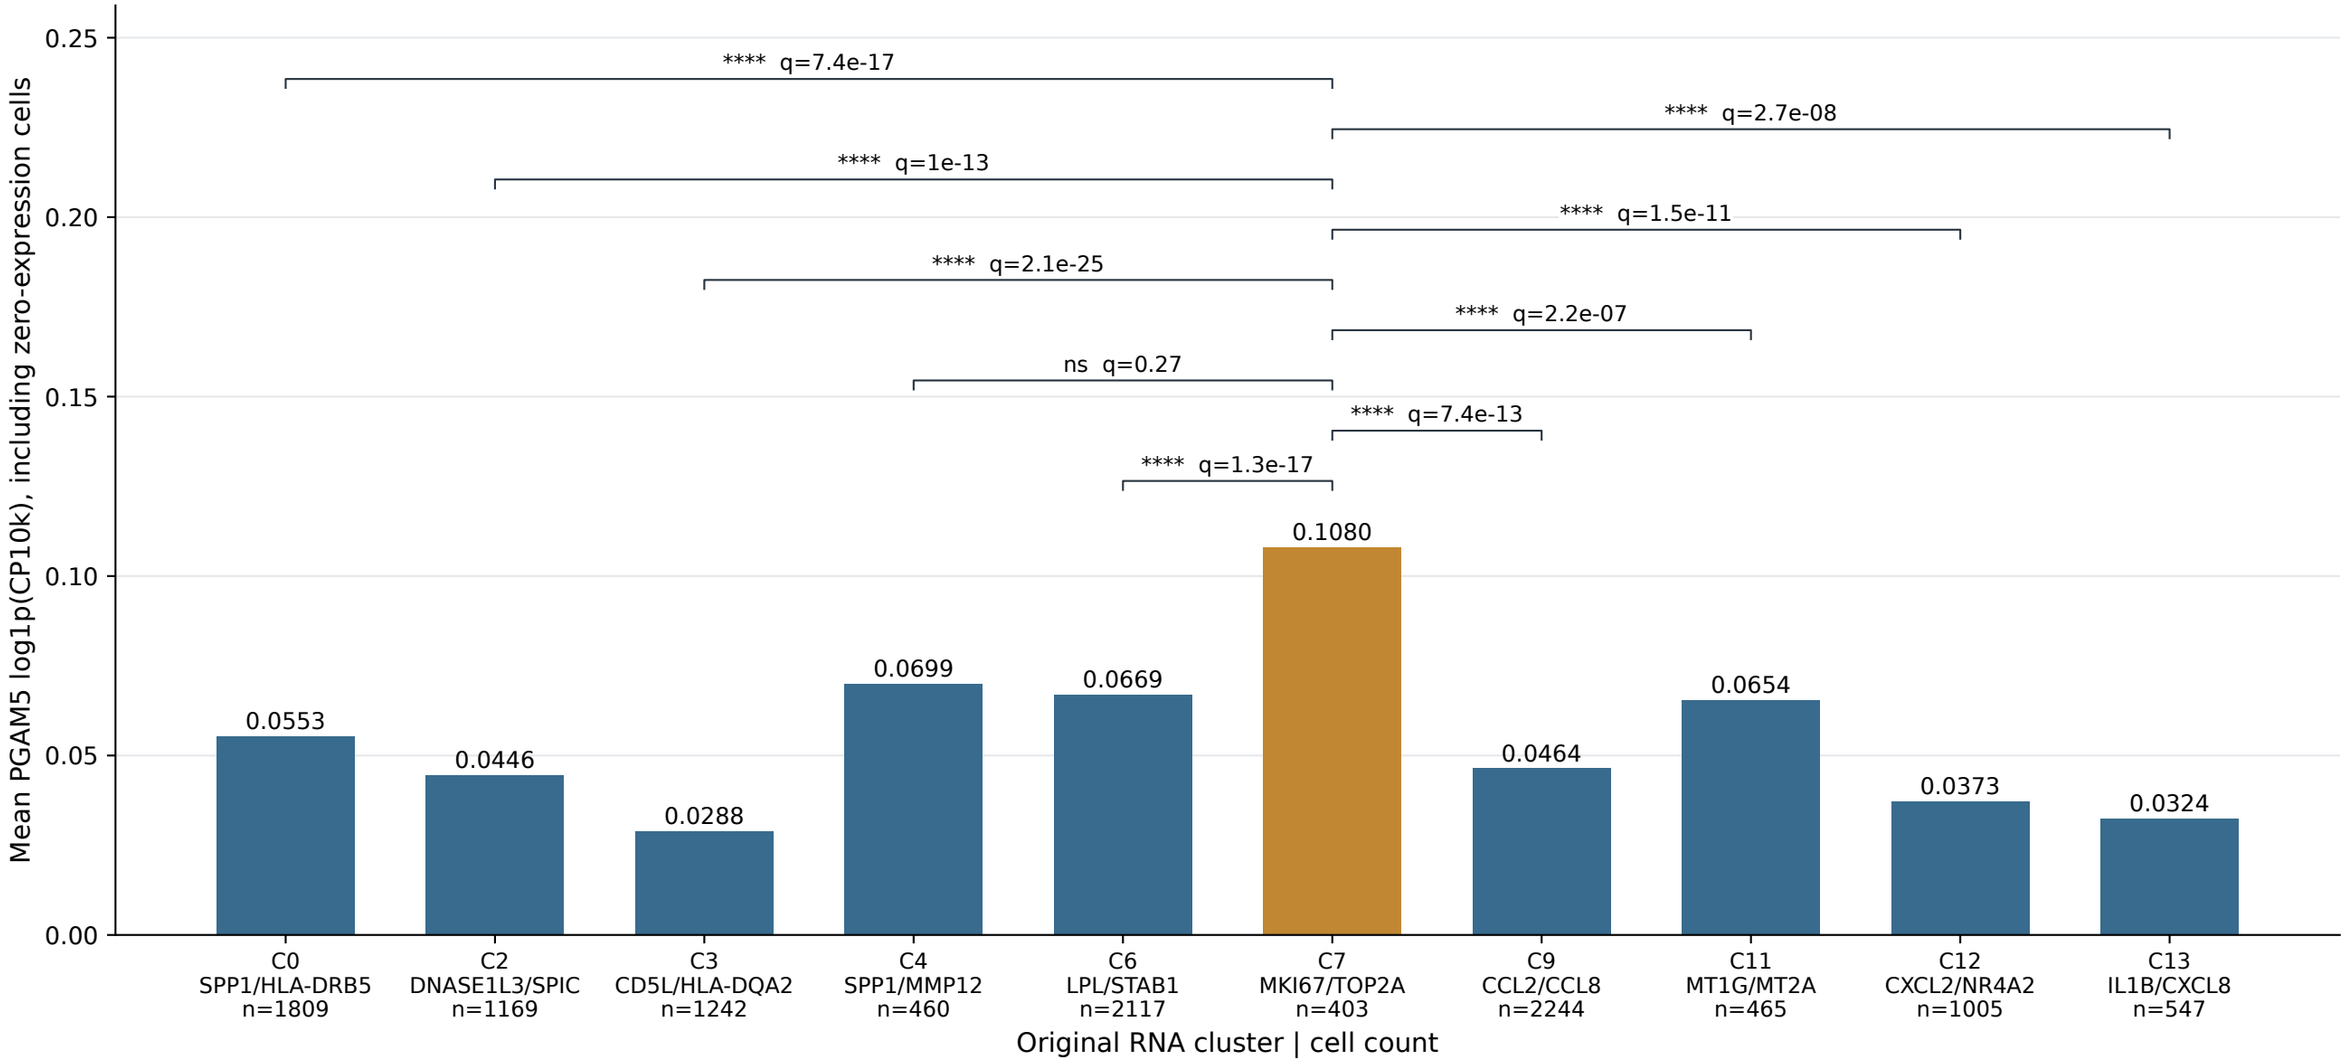
GSE202642 | PGAM5 expression abundance
Macrophage-related RNA clusters | C7 vs each other cluster



Two-sided cell-level Mann-Whitney U; BH-adjusted q across all 14 planned C7 comparisons.
* q<0.05; ** q<0.01; *** q<0.001; **** q<0.0001; ns: q>=0.05.
C0 and C2 retain macrophage-related annotations with hepatic/tumor RNA caveats.
Exploratory cell-level significance; patient-level evidence is reported separately. Bar heights match the source UMAP metric.
