

TCGA-LIHC: Progression-free interval (PFI) Exploratory PGAM5 RNA-detected macrophage reference coefficient

Number at risk (start of time point)

	0	24	48	72	96	120	144
High	179	40	16	7	3	1	0
Low	185	45	16	3	0	0	0

High > global median; Low ≤ median. Unvalidated reference: coefficients are not cell infiltration.
PFI is the available TCGA-CDR progression endpoint; it is not strictly defined PFS.
High/low PH diagnostic p = 0.009606; the fitted HR is not constant over time.
