GSE245908: spatial RNA programs | common scale for each program

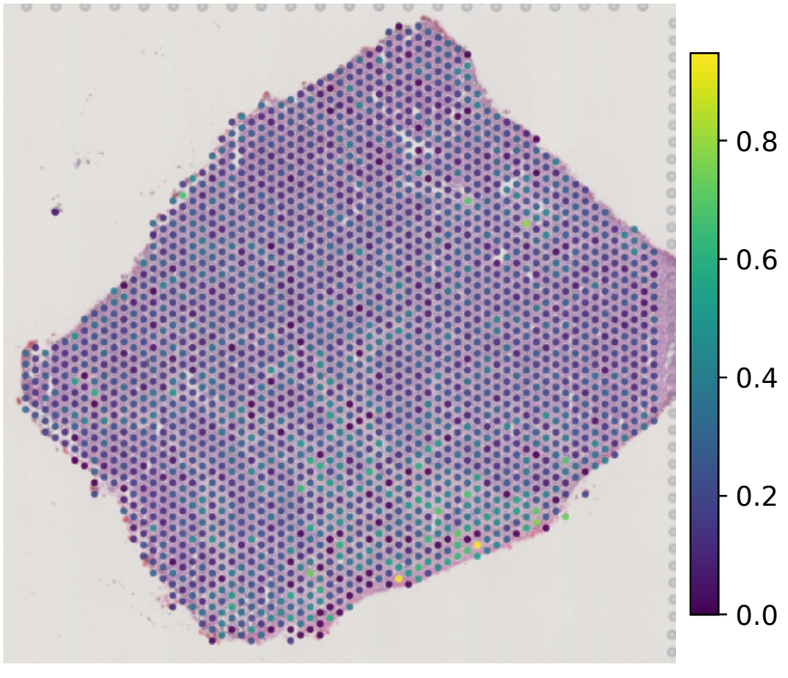

CHC20: Fibroblast matrix

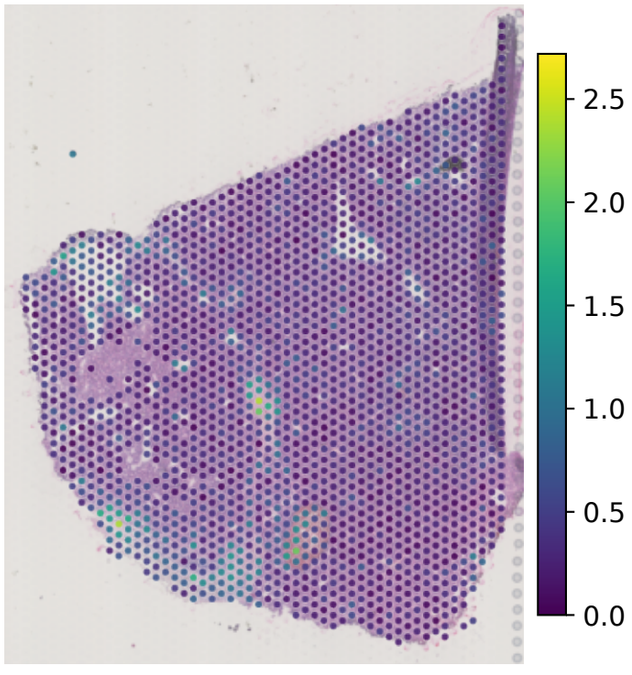

CHC20: Hepatocyte

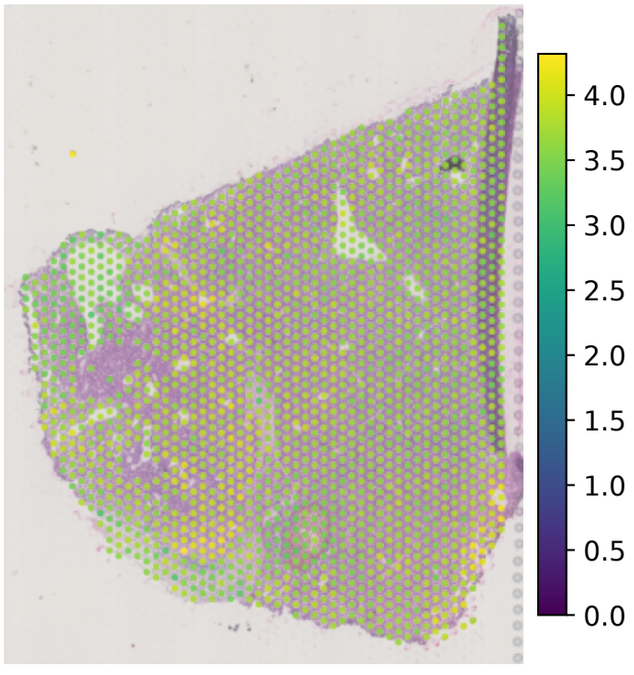

CHC20: THBS1 TREM1 myeloid

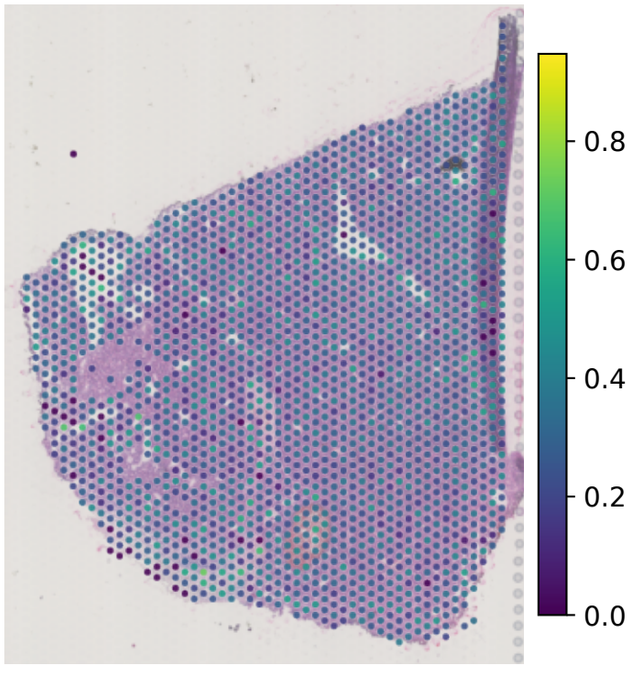

CHC23: Fibroblast matrix

CHC23: Hepatocyte

CHC23: THBS1 TREM1 myeloid

Program = mean gene log1p(CP10k), including zeros. Scores are RNA signals, not cell fractions.
THBS1/TREM1 panel is exploratory; its genes also occur outside myeloid cells.
