

TCGA-LIHC: PGAM5 RNA-detected macrophage coefficient
Exploratory v8 RNA contribution; 364/395 genes matched; 20 components

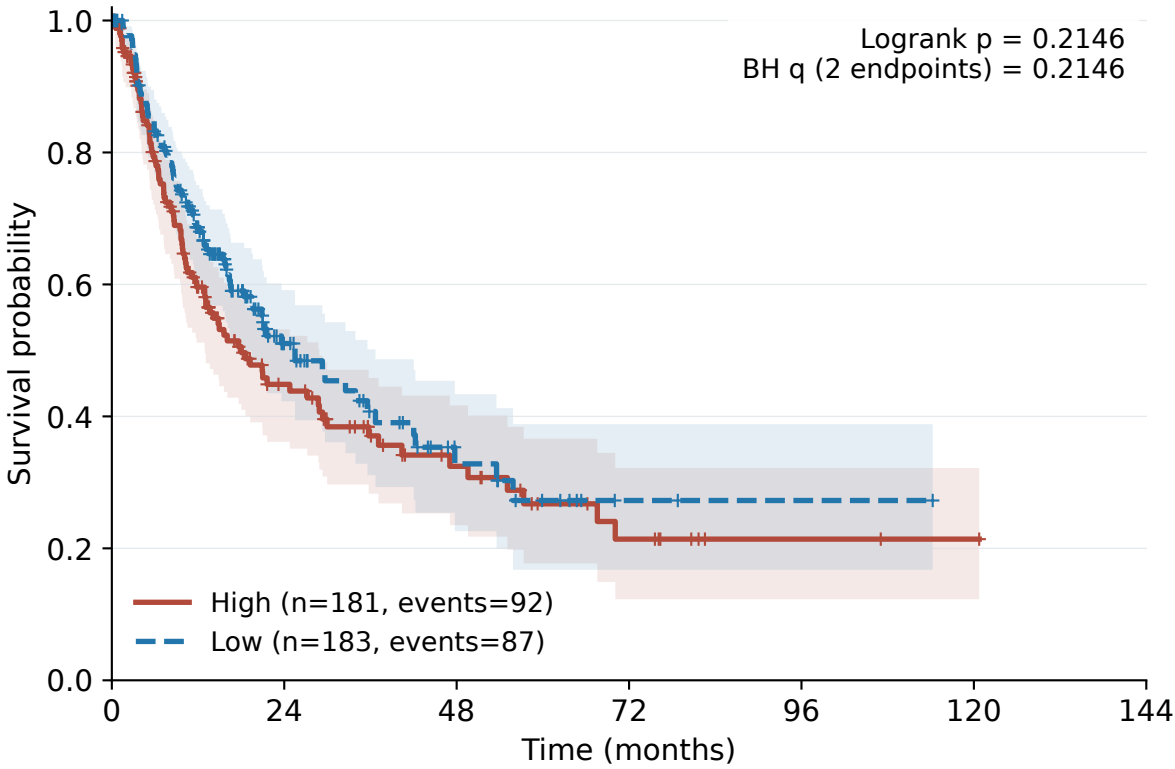

Overall survival (OS)

Number at risk (start of month)

	0	24	48	72	96	120	144
High	181	68	30	16	3	1	0
Low	182	72	33	10	3	0	0

Progression-free interval (PFI)

Number at risk (start of month)

	0	24	48	72	96	120	144
High	181	44	19	8	2	1	0
Low	183	41	13	2	1	0	0

High > global median; Low <= median. Shading: 95% CI. +: censored.
Uncalibrated coefficients, not validated cell fractions. Available progression endpoint: PFI, not PFS.
