

TCGA-LIHC: PGAM5 RNA-detected macrophage coefficient
Equalized cell RNA (sensitivity); 363/395 genes matched

Progression-free interval (PFI)

Number at risk (start of month)

	0	24	48	72	96	120	144
High	180	44	17	8	2	1	0
Low	184	41	15	2	1	0	0

High > global 371-patient median; Low <= median. Shading: 95% CI. +: censored.
Coefficients are uncalibrated; they are not validated cell fractions. PFI is not PFS.
